COOLKEEPER™ OVEN CURTAINS

Benefits

- Reduces loss of conditioned air
- Keeps excessive heat and smoke out of kitchen and dining areas
- Cuts air conditioning costs
- Reduces spoilage of fresh ingredients
- Improves oven efficiency
- Can decrease CFM requirements of exhaust fan
- Increases employee and customer comfort
- Velcro® mounting and modular design makes cleaning fast and easy
- Meets sanitary codes such as USDA and FDA

*The Oven Curtain that Saves Energy
while Keeping You Cool!*

The Coolkeeper™ consists of flexible vinyl strips which hang from the hood and surround the oven. By forming an effective thermal barrier, the Coolkeeper™ increases the efficiency of your exhaust and ventilation system, while boosting store comfort levels. The Coolkeeper™ is also extremely easy to install and maintain. The supplied Velcro strips are attached to the exhaust hood and the PVC panels are then attached to Velcro. When cleaning, just remove each panel and wash with soap and water.

September 20, 2000

Dear Phillip,
The Curtron Coolkeeper curtain is great. The heat from the oven is isolated within the curtain and the store stays safe and comfortable. (I've seen a significant reduction in cooling costs already.)

We've tried similar products, but the ease of cleaning and replacing the Coolkeeper panels makes this product a winner!

We need to get together and plan the Coolkeeper installation in my other stores ASAP!

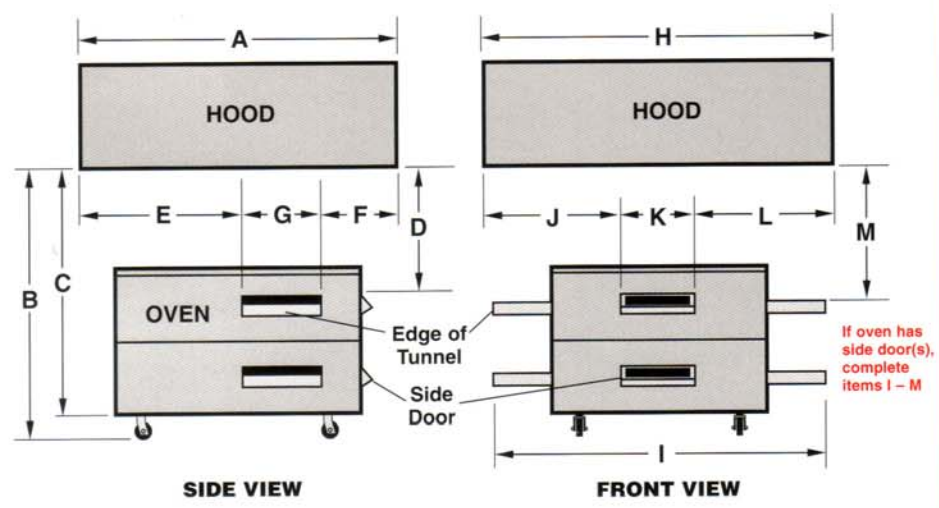

Sincerely,

Morgan Lacefield

A clear reach-through barrier that directs oven heat toward the exhaust fan.

HOW TO GET A QUOTATION

First, check the box that indicates the number of sides your enclosure requires. Then, fill in all of the dimensions (in inches) below. Finally, call or fax this information to your local representative or contact a Curtron sales person at 800.833.5005 (Fax: 412.787.3665).

- 3 Sided Enclosure 4 Sided Enclosure

- A – Hood Width (A = E + G + F) _____ "

OUR MONEY BACK GUARANTEE

We guarantee and stand behind every **COOLKEEPER™ Oven Curtain** we sell.

If you are not completely satisfied with the performance of your purchase, return the Oven Curtain to us within 30 days and we will exchange the Oven Curtain or refund your money.

Additionally, every product you purchase from Curtron carries a full year warranty.

We want you to be completely satisfied with every purchase.

OTHER QUALITY CURTRON PRODUCTS

POLAR PRO™ Swinging Doors are the economical solution for keeping your cooler and freezer temperature in the safety zone while allowing fast easy access for personnel. This unique and revolutionary design allows the door panels to swing on an even plane while maintaining a tight seal around hinge parts. Door panels are available in transparent and 5 colors. Options include impact plates, as well as vision strips and windows on colored models.

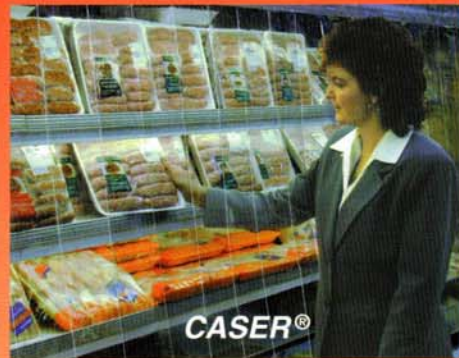

Air Doors inhibit contaminated air, dust, smoke, insects and odors from entering or leaving through openings while permitting unrestricted entry and exit. Heaters can be integrated into the system for customer or personnel comfort. Every air door is shipped with a 30 day money-back guarantee.

Strip Doors are the least expensive method of keeping a temperature controlled environment clean and contaminate free. Curtron Products offers three different models of strip doors to meet your needs. All comply with FDA and USDA regulations.

Caser® thermal curtains are made of super double polished clear PVC strips that allow easy access to cooled products. Velcro® fastening makes it easy to install and aesthetically pleasing.

Protecto Covers® are strong, durable covers that keep food fresh and clean. Covers are available in transparent and 5 colors. The **Breathable Mesh Covers** allow moisture and heat to dissipate quickly, while preventing flying insect contamination. **INSUL-COVERS®** transform open racks into inexpensive insulated cabinets.

All covers are made with double zippers to allow easy access to the trays. Velcro® is an option. Custom sizes are available.
